# HIPPA RELEASE Ingrid Edstrom, FNP M. Ed. Infrared Breast Health, LLC

Infrared Breast Health, LLC, is a digital infrared imaging clinic, which uses the latest technological advances in thermal imaging to provide non-invasive, physiological evaluations that are adjunctive to other medical diagnostic systems. By providing safe, non-invasive, effective and repeatable studies with thermographic imagery, we offer a cost-effective alternative screening to other more invasive diagnostic tests. Specifically applicable (but not limited to) the evaluation of breast health and muscular-skeletal disorders, thermographic imaging provides baseline information concerning the presence or absence of pathology present in tissue, vessels, and nerves. Additionally thermal imagery is ideal for on-going evaluation of therapeutic intervention and its efficacy. Infrared Thermal Imaging submits all studies to qualified licensed practitioners for interpretation. These practitioners are certified in the practice and interpretation of thermal imaging by the American Academy of Thermology, and International Academy of Clinical Thermology.

It is important to note that thermal imaging is not a stand-alone diagnostic procedure. A licensed practitioner must combine thermographic studies with clinical history and additional information to reach a diagnostic impression. Thermal studies are non-invasive, non-contact adjunctive tests and provide invaluable screening data that can contribute to the diagnostic process. Our studies do, however, provide evidence of the presence or absence of an asymmetry that can be indicative of vascular, neurological, muscular-skeletal or other physiological disorders.

I have read the above information and understand that I am not receiving a diagnosis of any condition. I understand that my thermographic scan is non-invasive and that the scanning camera is 'reading' the heat patterns displayed on my skin. From these patterns a physician qualified in interpretation will indicate any thermal asymmetry. I must take my thermal scan to a health practitioner of my choice, who can combine this information with my clinical history to formulate a diagnosis.

I want my Infrared report provided to me by 

Email or 

Hand mailed. In some circumstance I request and direct IBH/Ingrid Edstrom to email my IR JPEG images; copies of IR Reports or other forms that I want sent to radiologists or other MDs that are involved with my care,

## ADVANCE BENEFICIARY NOTICE (ABN)

Patient's Name:
Infrared Breast Health LLC expects that your insurance company which is may not pay for the breast scan. We do expect your insurance to reimburse for the following office visit portions minus your co pay or deductibles.
There are two codes billed on the first visit, the office visit $AND$ the scan / procedure code. (As an example: you see your doctor for an office visit and he sends you down the hall for an EKG which is also billed as a procedure done that day).
Breast Scan (Estimated Cost: \$160 in Eugene/Roseburg or \$190 when in done in Portland (circle site)), in case you have to pay for them yourself or through other insurance. That code is 93740.
<b>New patient consultation</b> is billed at \$250.00 (Billing code 99204, for a one hour visit) the day of the scan.
An Extended office visit is billed at \$175.00 for patients that are out of town and unable to do a follow up visit in the office two weeks later so they stay an additional one to one and a quarter hours after the scan to do the Proactive Breast Wellness Program. The Extended office visit will be in addition to the new patient consultation at your first time of service and the day of the scan (Billing code 99354).
Follow up office visits for local patients, cost \$165.00 (Billing code 99214) to do a one hour visit to go over the Proactive Breast Wellness Program when the infrared report is back. Other issues like labs, prescriptions, referrals to other offices etc .are managed during this visit
As a courtesy, the maximum you will have to pay for <b>each</b> office visit if applied toward deductible will be a reduced rate of \$85.00 per office visit.
The purpose of this form is to help you make an informed choice about whether or not you want to receive these items or services, knowing that you might have to pay for them yourself. Ingrid Edstrom is participating with certain insurance companies. However the breast scans may be disallowed, not considered reasonable and necessary by your insurance company, experimental or contract exclusion.
YES. I want to receive these items or services. I understand that my insurance company may not decide to pay for the above services. Please submit my claim to my insurance company. I understand that you may bill me for items or services and that I may have to pay the bill while my insurance company is making its decision. If my insurance does pay for the breast scan, you will refund to me any payments I made to you that are due to me. I am still responsible for the co pay or deductible for the office visits as discussed above. If my insurance denies payment, I agree to be personally and fully responsible for payment. That is, I will pay personally, either out of pocket or through any other insurance that I have. I understand I can appeal my insurance company's decision.
